

STALL GRID can be used for horse stalls, paddock areas, indoor and outdoor arenas!

STALL GRID

THE ULTIMATE SOLUTION
FOR A DIG FREE FLOOR WITH
SUPERIOR DRAINAGE!

OPTIMUM SIZE
24" x 24" x 1"
reduces cut-offs.

BEFORE . . .

. . . AFTER

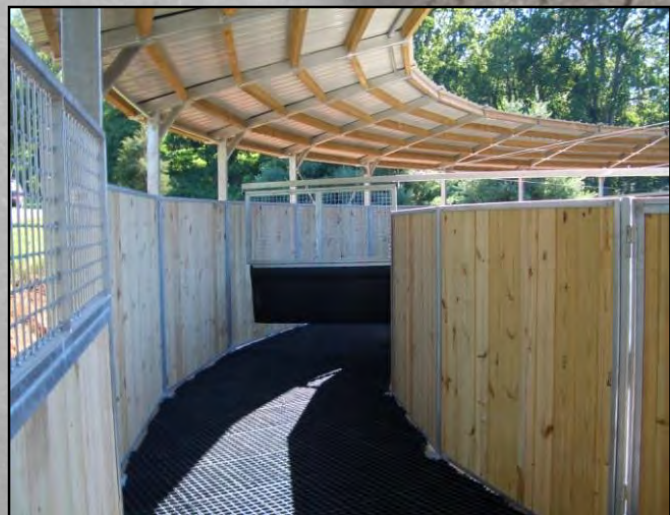

Stall grids are made of durable plastic material with interlocking system for easy installation!

The configuration and strength of the grid have been specially developed for horses' hooves.

The shock-absorbing effect of the grids means the floor is easy on the animal's joints during the exercise!

BENEFITS:

- A FLOOR FREE OF MUD
- SAFE DRAINAGE
- PREVENTS SOIL COMPACTION
- WEATHER & UV RESISTANT
- PREVENTS HORSES FROM DIGGING
- USE REGULAR BEDDING ON TOP

Fast & Easy Installation in a few steps!

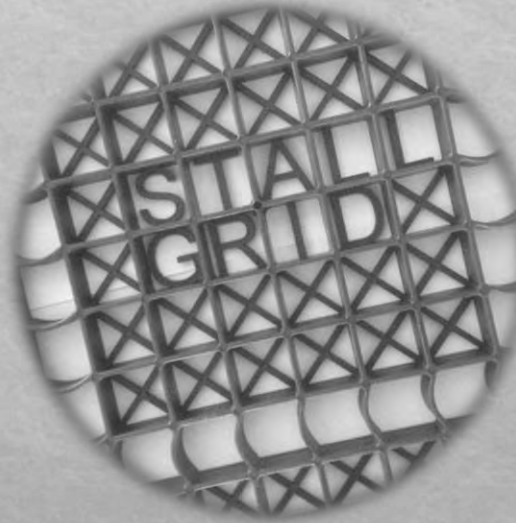

- STEP #1 For the base you will need 8" of #57 gravel
- STEP #2 Compact well
- STEP #3 Lay the grid with "stall grid" facing up
- STEP #4 Fill with pea gravel
- STEP #5 Compact well again
